# EG-P DUCT SEAL COMPOUND
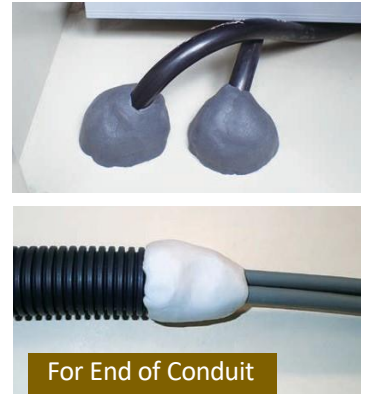

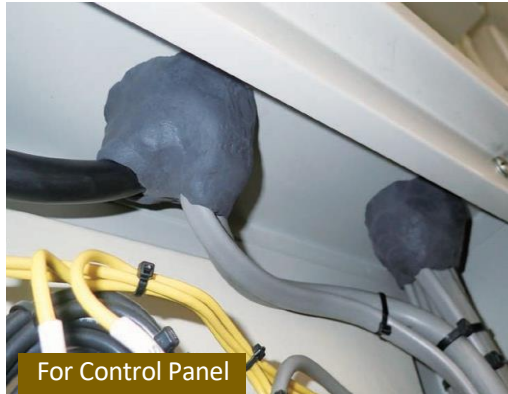

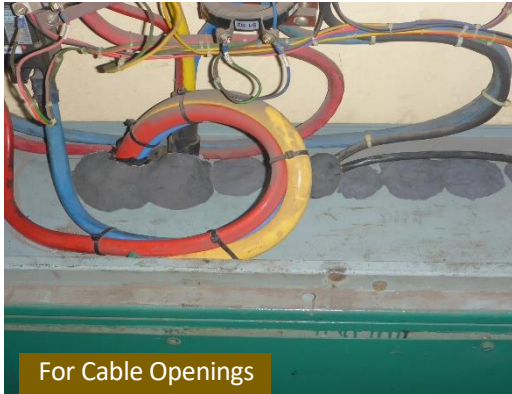

**To seal openings from air, water or dust.**
**Excel at various openings filling in indoor and outdoor.**

For Cable Openings

For Control Panel

For End of Conduit

**Excellent in water resistance and weather resistance.**

**Super lightweight and easy to install. "Easy Putty"**
**Excel at various holes filling in indoor and outdoor locations.**

◆ **Good Workability**
**Good workability** with the **non-sticky** and **lightweight** putty. Easy to remove and re-install due to the non-curable type.

◆ **Applicable to various places**
Usable both in indoor and outdoor places for its **excellent water resistance** and **weather resistance**. Applicable to various places.

## SUPER LIGHT WEIGHT PUTTY

### It's a great deal. Why?

**EG-P**

**OTHER PUTTY**

When the Weight of putty = 250g
↓
SUPER LIGHT Specific gravity = 1.0
↓
The amount of putty = 250ml

When the Weight of putty = 250g
↓
Specific gravity = 2.0
↓
The amount of putty = 125ml

x2

USABLE AMOUNT WOULD BE **DOUBLE**

¿Think of those as almost the same price?

# Technical Data

① Color: Gray

② Consistency: 65  (JIS A 5752)

③ Specific gravity: 1.0 (water displacement method)

④ Flame retardance: None

⑤ Insulation (Ordinarily $\geqq 10^8$ Ω cm): $3.6 \times 10^{12}$

⑥ Heat conductivity（W/m・K）: 0.35

⑦ Accelerated weathering resistance: No abnormalities after 600 hours of testing in Super UV Tester

⑧ Water resistance: No abnormalities after immersion in tap water (room temperature) for one month

⑨ Effects on cable sheathings: None

⑩ Effects on metals: None

## Storage and use conditions

(1) Avoid exposure to direct sunlight or high humidity. Store the product in a room at 40℃ or less.

(2) Do not use the product in areas or parts continuously immersed in water or in contact with oil.

(3) Read the precautions printed on the product or the SDS, etc. for additional and detailed information.

## Sales unit, Packaging

250g (250ml) in polyethylene bag

Carton: 1.25kg corrugated cardboard carton (250g in bag x 5)

---

### For the fire protection methods… Fire Stop Putty-KP

**Lightweight**

1.0 of specific gravity.

**Excellent fireproof performance**

2hours fireproof performance has been certified.
(UL System No.C-BJ-3035)

**Optimum for small openings**

Suitable for circular openings up to 150mm in diameter.

**Soft and easy to fill**

Compatibly adheres to various building materials. Can be conveniently used for finishing work by sealing any parts.
